PROJECT UPDATE MEIROWA PRIMARY SCHOOL ~ DINING HALL ~ Meirowa, Tanzania

04 July 2014

- The construction of the dining hall is now complete with the paintwork and glazing most recently completed
- The community has requested to hold-off on the official handover ceremony due to various projects involving other stakeholders, being run simultaneously and completion of these is imminent. In addition, one handover ceremony will mark the launch of all these projects since all of them have had the tremendous support of the community at large.
- We are working on finalising expenditure so that we can establish whether there will be a surplus and how much that amount will be
- We would like to request any surplus from the Dining Hall construction be carried over to the purchase of furniture, dishware and utensils to make this facility functional, once we've established what the surplus from the construction is.
